Majestic Mountain Pine Tree

Majestic Mountain Pine Trees are pro-grade artificial Christmas tower trees that are easy to install, decorate and store. We work closely with our manufacturers to craft high quality, durable products and make sure that each component of the tree will outlast outdoor winter weather. The Majestic Mountain Pine Tree features a ring frame design and artificial foliage with a natural appearance and texture.

Spectacularly saturated in warm white lights, the tree features professional grade LED lights that illuminate the realistic details of the tree. The Majestic Mountain Pine Tree is easy to install and comes with lifetime technical support.

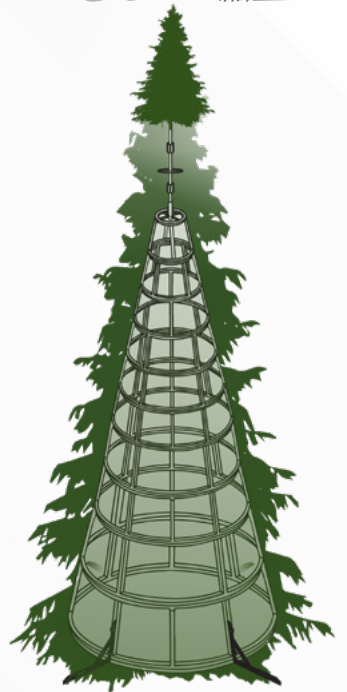

frame

- Sizes: from 12' to 50', offered in 2' increments. Grow the tree over time by adding new frames.
- 2' concentric frame rings for maximum rigidity. Additional frames can be added to the tree any time increase the height, making the MMP tree a smart long-term investment for your Christmas attraction.
- Lettering and color system makes it easy to assemble the frame.

foliage

- Tapered tips for a smooth end to each branch. No unfinished tips or unraveling.
- UV treated foliage helps protect against sun damage.

The Majestic Mountain Pine Tree is one of the nation's most popular tower tree designs due to its realistic appearance. Unlike other trees that have a panel or garland-wrap design, the Majestic Mountain Pine Tree features rich, dimensional branches that attach around the frame. This creates a very natural tree look with a high level of detail and depth from every angle, especially from the ground.

lights

- Pre-lit with fully rectified 5mm wide angle LED lights at 2800K color temperature. UL-listed lights are the best in the industry.
- 100 tightly-wrapped lights per branch, illuminating the tree from within.
- The LED lights carried by our webstore are the same pro grade lights we use on our Majestic Mountain Pine Trees, so replacement light sets blend nicely. Note: LED lights can sometimes dim over time, so the light intensity of new sets may be slightly different.
- The tree comes with a heavy duty, outdoor-rated electrical wiring harness that was specially designed for the Majestic Mountain Pine Tree.

ornaments

- Shatterproof ornaments are pre-wired through the ornament, not the cap, for extra durability.
- Ornaments are UV-coated to protect against sun damage.

warranty

Tree warranties cover:

- Seven years for the frame
- Seven years for branches
- Three years for lights
